

FRANCISCO NICOLAS HERNANDORENA

Leader | Software Developer

PROFILE

I was born on February 14, 2004, in San Pedro, province of Buenos Aires, Argentina. I am obsessed with making everything as good as possible, prioritizing its usefulness over time, being able to support greater scalability, and being as neat and aesthetic as possible. I have a great ability to solve problems momentarily by finding functional and practical solutions. I have a very open mind to any type of idea and immense general knowledge, useful to face any type of problem. I consider myself a leader by nature, with the necessary coldness but with character to lead a group and different decisions.
